PROJECTS

Rick Morty UTN

August - 2023

Project carried out for the first section of the diploma in "Full Stack Web Programmer" at the UTN university. In this project I had to consume the Rick & Morty API, create routing for navigation with React Router and be able to filter the characters based on certain characteristics (REACT , CSS).

Deploy : <https://rick-morty-utn.vercel.app/>

Repository : <https://github.com/FranciscoMeglia/Rick-Morty-UTN>

Nike Ecommerce

November - 2023

Nike ecommerce inspired by the Nike page made with a colleague from the UTN university. It is made with React, React Router, CSS and Bootstrap. It has filters and all the functionalities of a traditional Ecommerce.
